PROJECTS – Accessible via www.jordanweitz.ca

Capstone (Newcomer's Platform)
Front End Developer   September 2021 - Present
- Utilizing Javascript (React), HTML (JSX) and CSS skills to create dynamic web pages that fulfill client requirements.
- Responsible for creating the Administrator Dashboard that will be used to manage the userbase and view flagged posts and events.
- Created classic pagination component that allows end user to quickly browse content.
- Worked collaboratively with the Back End Team to create Search functionality to enable users to quickly search for users, posts and events that match their query.
- Oversaw Front End VCS. Responsible for reviewing and approving pull requests of four developers (Github).

Clean Room App
Full Stack Application (React, Node, MongoDB)   February 2022 – March 2022
- Designed and implemented a full-stack application that allows end users to register/login and post images/text on a communal message board.
- Highlighted the importance of mental health and cleaning your living space.
- Created robust documentation on Node side of application.
- Utilized Express library on back end to create efficient routes/endpoints for React front end.

Portfolio Website

React   March 2022
- Created a custom designed portfolio website using React library.
- Implemented responsive CSS utilizing media breakpoints.
- Showcases side projects, programming skills/preferences and allows potential employers to quickly connect via email.

Home Inventory Application

Java EE, JSP's + Servlets, JPA, HTML, CSS, SQL.   July 2021 (3rd Semester)
- Allows end users to register, login, manage personal inventory, manage personal information, and manage userbase (if Administrator).
- Learned to properly implement MVC architecture to ensure sufficient separation of concerns and maintain code readability.
- Utilized JPA library to manage SQL database that holds user information.
- Developed proficiency with Java Enterprise Edition framework – learning concepts such as Servlets, Filters and JPA

VOLUNTEER EXPERIENCE

DEFEND   **Canada**

Front End Team Lead   October 2021 - Present
- Leading the development of DEFEND's ecommerce store.
- Initially accepted as a front-end developer and gained increased responsibility through promotion to Team Lead (promotion granted by Vice President).
- Supervising team of volunteer developers (5+) and delegating tasks appropriately.
- Performing system's requirements analysis to determine proper technology selection for front-end commensurate with DEFEND's vision.
- Utilizing HTML/CSS/Javascript (React) skills to create prototype dynamic templates for business web application.
